

*Lyrics spoken set to the music:*

I love music! It's the bright part of my day and I get to express myself.

We need your help to make the music program better.

The music program owns dozens of instruments for students to use but many of them are broken and the music program cannot afford to fix them.

This is a problem because first of all the school owns a bunch of instruments that cannot be used.

Second, it limits us as musicians because we're limited to a single instrument as through playing we grow as music and we often learn a lot when we play more than one instrument.

I ask you to give more funds to the band program so we can fix the instruments that need fixing and so our broken instruments are no longer broken and in the hands of young musicians.
